

Comparison of LowPoly Forest Lite and Mega - Pack Versions

Introduction

This document outlines the key differences between the **Lite** and **Mega Pack** versions of **LowPoly Forest**. The **Lite version serves as a demo** offering a glimpse into the full potential of the Mega Pack. While it includes the core essentials, the Mega Pack delivers a complete low-poly ecosystem with thousands of optimized assets and enhanced seasonal content.

Content Comparison		
Contents	LowPoly Forest - Lite	LowPoly Forest - Mega Pack
Prefabs	118 (Basic set, limited variety)	5684 (Complete ecosystem with detailed assets)
Meshes	265 (Only essential models)	9386 (Rich variety, optimized for performance)
Textures	6 (Essential textures)	22 (Different seasons, various grasses, additional textures)
Materials	9 (Essential materials)	25 (Different seasons, various grasses, additional materials)
Scenes	4 (Small demo scenes)	5 (Large, fully detailed environments)

Conclusion

The Lite Pack is ideal for quick tests or lightweight projects, but it only scratches the surface of what's possible. For developers seeking a complete, production-ready forest environment with vast content and seasonal variations, the Mega Pack is the clear choice.

Ready to take your project to the next level?

Unlock the full power of LowPoly Forest with the **Mega Pack** featuring over 9,000 meshes, advanced seasonal content, and fully detailed scenes.
